Brazil

SUMMARY

Full-stack software engineer with 5+ years of professional experience across web applications, using React, Node.js, Python, and PostgreSQL.

Takes features from requirements through release, with CI/CD, cloud storage, and production observability using Grafana, Loki, and Sentry.

Builds AI workflows with OpenAI API, RAG, and supervised agents, backed by output validation and human review.

SKILLS

Frontend: React, Next.js, Angular, Tailwind CSS, HTML5, CSS3.

Backend & APIs: Python, Node.js, TypeScript, JavaScript, REST APIs, API design, System integrations.

Data & Storage: PostgreSQL, SQL, Read-only diagnostics, Redis, Firestore, Data validation.

Cloud & Delivery: Docker, Amazon Web Services (AWS) S3, Git, GitHub Actions, CI/CD, Runbooks, Deployment validation.

Observability: Grafana, Loki, Sentry, Monitoring, Production diagnostics, Release validation.

Applied AI: OpenAI API, RAG, Embeddings, Structured prompts, Supervised AI agents, Model Context Protocol (MCP), Structured output validation.

EXPERIENCE

Full-Stack Software Engineer - Legal technology SaaS

Jul 2024 - Present

Remote, Brazil

- Built full-stack product features across React interfaces, Node.js and Python APIs, and PostgreSQL-backed workflows.
- Developed applied AI workflows with OpenAI API, RAG, and supervised agents, adding output checks and human review.
- Connected frontend, backend, and integrations with acceptance criteria and release validation across end-to-end product flows.
- Investigated production issues with Grafana, Loki, Sentry, and read-only SQL, then verified changes after deployment.
- Contributed to Docker-based delivery, CI/CD, and AWS S3 storage, validating releases and monitoring production behavior.

Full-Stack Developer - Grupo Dass

Feb 2021 - Jul 2024

On-site, Brazil

- Built internal web applications and process automations with Angular, Node.js, PHP, and PostgreSQL for industrial operations.
- Owned feature work from requirements through frontend and backend implementation, release, and ongoing application support.
- Collaborated with engineering and operations teams in Lean, Scrum, and Kanban workflows to turn needs into maintainable software.

Frontend Developer (Freelance) - Freelancer

Jul 2021 - Jul 2024

Remote, part-time

- Delivered responsive websites and interfaces with React, JavaScript, Bootstrap, HTML, and CSS for independent clients.

PROJECTS

Technical Portfolio (Public project)

https://josivan-amorim.vercel.app

- Built this portfolio with Next.js, React, TypeScript, Tailwind CSS, MDX, Vercel, and automated Lighthouse checks.
- Documented technical case studies on applied AI, observability, and release validation to explain engineering trade-offs and outcomes.

EDUCATION

UNIFACS - Universidade Salvador - Technologist Degree in Systems Analysis and Development (2021 - 2023)

LANGUAGES

- Portuguese - Native
- English - B2 (professional working proficiency)
